

Falun Gong Survivors in Virginia

Falun Gong is a self-improvement practice of mind, body and spirit that is based on the universal principles of Truthfulness, Compassion and Tolerance. It was introduced in Virginia in 1996. It has helped many local residents attain physical, mental and spiritual wellness. Since the time that China's persecution started on July 20 of 1999, the Chinese Communist Party (CCP) has been torturing and killing Falun Gong practitioners, and continues to harvest their vital organs and corneas for its lucrative organ transplantation industry.
